

Brian Perry, AI and Cyber-Security Professional

HazzardUS@pm.me | +1 972 836 9981 | <https://github.com/bp3rry/brian-perry-resume>

SUMMARY

Senior security architect and AI security advisor with security consulting, managed security services, and technical sales-support experience. Current hands-on work spans AI-assisted security risk assessment, security automation, application and software supply-chain security, cloud and infrastructure security, and AI-agent workflows.

EXPERIENCE

Dell EMC | Senior Security Architect, Security Consultant | 2016-2026

- Manage SDL assessment and compliance for multi-cloud product portfolio
- Implement AI assisted security assessment and vulnerability management, automation

VCE (acquired by Dell EMC) | Senior Security Architect, Security Consultant, Product Manager | 2011-2016

- Manage SDL assessment and compliance for converged product portfolio
- Contributed to product design, architecture, security features, and lifecycle support.
- Provided pre-sales and technical sales support for Vblock systems and solutions.

Anthelio Healthcare Solutions (formerly PHNS) | Senior Director of Information Security, Global Information Security Officer, Practice Manager - Managed Security Services | 2002-2011

- Managed Managed Security Services with P&L responsibility of \$2.5M.

Citadel Security | Senior Security Engineer, Vulnerability/Remediation Researcher | 2002

- Delivered pre- and post-sales implementation, technical engineering, and support for an automated vulnerability-remediation solution.

netForensics | Senior Security Engineer, Regional Manager | 2001-2002

- Delivered pre- and post-sales implementation, technical engineering, and support for SIEM solutions.

Affiliated Computer Services | Field Services Engineer and Delivery Manager

- Provided security consulting, intrusion detection, incident response, and service-delivery support.

Digicorp | Field Services Engineer and Delivery Manager

- Provided network and system engineering services to clients such as Rockwell Aerospace/NASA and large oil-and-gas clients.

Southwestern Office Systems | Field Services Engineer and Delivery Manager

- Provided network and system engineering and sales support for SMB clients.

SKILLS

- Security Automation and AI Workflows: Cognition, Windsurf, Devin CLI, GitHub Copilot CLI, MCP integration, Python, GitHub Actions, CI/CD, AI-agent design and orchestration, LLMs, AI cluster design and security
- Threat and Vulnerability Management: Vulnerability assessment and remediation, Attack surface management, CVE management, Threat modeling, Incident response, SIEM, XDR/EDR

- Application and Supply-Chain Security: SAST, SCA, DAST, SBOM/SPDX, Dependency scanning, Container scanning, OWASP
- Cloud, Infrastructure, and OT Security: AWS, Azure, GCP, Docker, Kubernetes, Infrastructure as code, Critical-facilities risk assessment, OT/SCADA security assessment

PROFESSIONAL QUALIFICATIONS

- Certificate of Cloud Security Knowledge (CCSK) - Cloud Security Alliance
- Cloud Security Alliance - DFW Chapter | Founder | 2011-2015
<https://cloudsecurityalliance.org/chapters/global>
- First Class Limited Stationary Engineer - Critical infrastructure operation and maintenance training

PROJECT EVIDENCE

- Security Engineering Automation: Recent hands-on engineering work spanning vulnerability-management workflows, threat modeling, security review, and security automation.
- Cloud and DevSecOps Engineering: Recent implementation work across cloud platforms, containers, infrastructure as code, CI/CD, and security-scanning practices.
- AI-Agent and LLM Workflows: Recent work designing and implementing AI-agent, LLM, prompt-engineering, and agentic-workflow artifacts.
- [Necessity: AI-Assisted Security Assessment](../projects/necessity-ai-assisted-security-assessment.md): Recent hands-on development of a web- and Python CLI-based security-assessment application that orchestrates security tools to assess systems and applications and produce remediation-oriented reports.
- brian-perry-resume: Ongoing maintenance of a public resume and evidence portfolio using AI-assisted workflows, source-based technology descriptions, generated indexes, and validation.
