

Brian Perry, AI and Cyber-Security Professional

HazzardUS@pm.me | +1 972 836 9981 | <https://github.com/bp3rry/brian-perry-resume>

SUMMARY

Senior security architect and advisor with security architecture, consulting, managed security services, and technical sales-support experience. Current hands-on work spans AI-assisted security risk assessment, security automation, application and software supply-chain security, cloud and infrastructure security, and AI-agent workflows.

EXPERIENCE

VCE (acquired by Dell EMC) | Senior Security Architect, Security Consultant, Product Manager
| 2011-07-Present

- Contributed to product design, architecture, security features, and lifecycle support.
- Provided pre-sales and technical sales support for Vblock systems and solutions.

Cloud Security Alliance - DFW Chapter | Founder | 2011-06-2015-12

- Founded the chapter under the CSA charter and led cloud-security research and discussion.
- Hosted chapter cloud infrastructure and managed finances, meetings, communications, and fundraising.

Anthelio Healthcare Solutions (formerly PHNS) | Senior Director of Information Security, Global Information Security Officer, Practice Manager - Managed Security Services |
2002-10-2011-07

- Managed Managed Security Services with P&L responsibility of \$2.5M.

Citadel Security | Senior Security Engineer, Vulnerability/Remediation Researcher |
2002-05-2002-10

- Delivered pre- and post-sales implementation, technical engineering, and support for an automated vulnerability-remediation solution.

netForensics | Senior Security Engineer, Regional Manager | 2001-10-2002-05

- Delivered pre- and post-sales implementation, technical engineering, and support for SIEM solutions.

Affiliated Computer Services | Field Services Engineer and Delivery Manager

- Provided security consulting, intrusion detection, incident response, and service-delivery support.

Digicorp | Field Services Engineer and Delivery Manager

- Provided network and system engineering services to clients such as Rockwell Aerospace/NASA and large oil-and-gas clients.

Southwestern Office Systems | Field Services Engineer and Delivery Manager

- Provided network and system engineering services to clients such as Rockwell Aerospace/NASA and large oil-and-gas clients.

SKILLS

Threat and Vulnerability Management: Vulnerability assessment and remediation, Attack surface management, CVE management, Threat modeling, Incident response, SIEM, XDR/EDR
Application and Supply-Chain Security: SAST, SCA, DAST, SBOM/SPDX, Dependency scanning,

Container scanning, OWASP

Cloud, Infrastructure, and OT Security: AWS, Azure, GCP, Docker, Kubernetes,
Infrastructure as code, Critical-facilities risk assessment, OT/SCADA security assessment
Security Automation and AI Workflows: Python, Go, TypeScript, GitHub Actions, CI/CD,
AI-agent design and orchestration, LLMs, LangChain

PROFESSIONAL QUALIFICATIONS

- Certificate of Cloud Security Knowledge (CCSK) - Cloud Security Alliance
- First Class Limited Stationary Engineer - Critical infrastructure operation and maintenance training

PROJECT EVIDENCE

- Security Engineering Automation: Recent hands-on engineering work spanning vulnerability-management workflows, threat modeling, security review, and security automation.
- Cloud and DevSecOps Engineering: Recent implementation work across cloud platforms, containers, infrastructure as code, CI/CD, and security-scanning practices.
- AI-Agent and LLM Workflows: Recent work designing and implementing AI-agent, LLM, prompt-engineering, and agentic-workflow artifacts.
- [Necessity: AI-Assisted Security Assessment](../projects/necessity-ai-assisted-security-assessment.md): Recent hands-on development of a web- and Python CLI-based security-assessment application that orchestrates security tools to assess systems and applications and produce remediation-oriented reports.
- brian-perry-resume: Ongoing maintenance of a public resume and evidence portfolio using AI-assisted workflows, source-based technology descriptions, generated indexes, and validation.
